ABOUT PHOTOSENSITIVE SEIZURES

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms including: lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting farther from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

OTHER IMPORTANT HEALTH AND SAFETY INFORMATION

The Xbox video game system documentation contains important safety and health information that you should read and understand before using this software.

AVOID DAMAGE TO YOUR TELEVISION

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be safely played on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.
This product has been rated by the entertainment Software Rating Board. For information about the ESRB rating, or to comment about the appropriateness of the rating, please contact the ESRB at 1-800-771-3772.

INTRODUCTION

You sat there on your couch all season tellin' your friends you could chump Vince Carter in a game of one on one. Well, it's time to walk the walk. *NBA Live 2002* comes to the Xbox™ video game system from Microsoft® for the first time with all the game you could want, and it's your turn to run with the rock now.

Take your team through the paces of a rigorous Season, or build them up to an NBA powerhouse in Franchise mode. Or, if you want to make it personal, 1 on 1 mode lets you test your game against any player in the league.

This game is for real. So save your bricks and flops for when you're playing with that overweight, burger-munchin', chest-thumpin' sofa jockey you call a friend.

◆ **Look Good While Playing Good**—Style up your players with knee pads and knee braces, arm and head bands, different sock lengths, sweet shoe styles, and more.

◆ **Own The Paint**—Throw your weight around under the basket with a wide range of post moves, a bigger shot selection, easier post defense, and defensive rebounding.

◆ **Build The Next NBA Dynasty**—Run the court season-to-season in Franchise Mode and build the team that everyone fears.

◆ **Try To Keep Up**—A faster frame rate picks up the pace and speeds up the game.

◆ **Come On, Ref!**—Things get heated on the hard court with new player-player and player-referee interactions.

◆ **The Legends Take The Court**—Take Hall of Famers and Court Legends 5-on-5 or 1-on-1 and decide for yourself who are the greatest players of all time.

For more info about this and other titles, visit EA SPORTS™ on the web at **www.easports.com**.
